01 | INTRODUCTION TO KAFRA SIGNAL

Why KAFRA Is Different

What is KAFRA SIGNAL?

KAFRA SIGNAL is a web-based trading signal platform designed specifically for the **Gold (XAUUSD)** market. It combines advanced technical analysis algorithms with an intuitive interface, empowering traders of all levels to make confident trading decisions.

- No need to install any indicator in MT4/MT5 or TradingView — everything is in the dashboard.
- Signals are updated automatically on a consistent schedule.
- Two trading modes: Scalping (short-term) and Intraday (longer trend).
- Live display of Entry, TP1, TP2, TP3, Stop Loss and Pips Gain.
- Built-in Tactical Planner to calculate lot size based on your risk amount.

Who is KAFRA SIGNAL For?

Beginner Trader	Simply follow the signal without needing deep technical knowledge.
Active Trader	Use as additional confirmation for your own trading decisions.
Busy Trader	Receive ready-made signals; no need to monitor charts all day.
Scalp Trader	Choose Scalping mode for signals generated every 30 minutes.
Intraday Trader	Choose Intraday mode for trades with larger TP targets.

02 | GETTING STARTED

Access Key, Login & Initial Setup

Login Process (Done in 3 Minutes!)

1	Get Your Access Key After payment/registration, you will receive a unique Access Key. This key is your identity — keep it safe.
2	Open the KAFRA Dashboard Visit the KAFRA dashboard URL provided using any browser (Chrome/Safari/Edge). No additional app installation is required.
3	Enter Your Access Key Type or paste your Access Key into the 'AUTHORIZATION KEY' field. Click the eye icon to verify spelling before pressing AUTHORIZE.
4	Click AUTHORIZE Press the blue AUTHORIZE button. If successful, you will be taken directly to the main dashboard.
5	Agree to the Disclaimer Read and agree to the Important Trading Disclaimer that will appear. Click 'I Understand, Continue' to proceed.

Login Screen – KAFRA FIREWALL

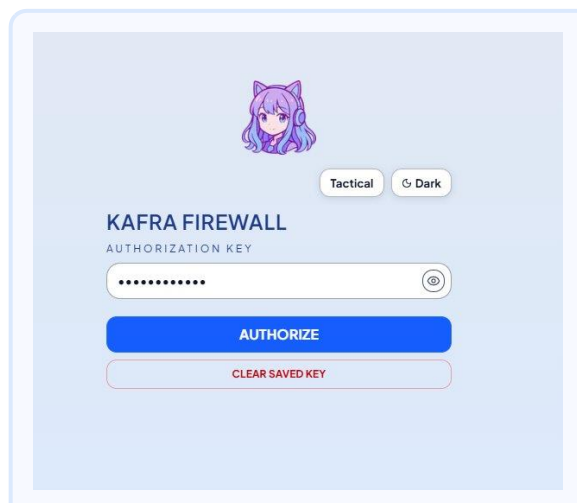

Figure 2.1 – KAFRA FIREWALL login screen

■ Your key is saved automatically. Next time, simply click AUTHORIZE without re-entering it.

■ Never share your Access Key with anyone. Each key is strictly for 1 user only.

Trading Disclaimer

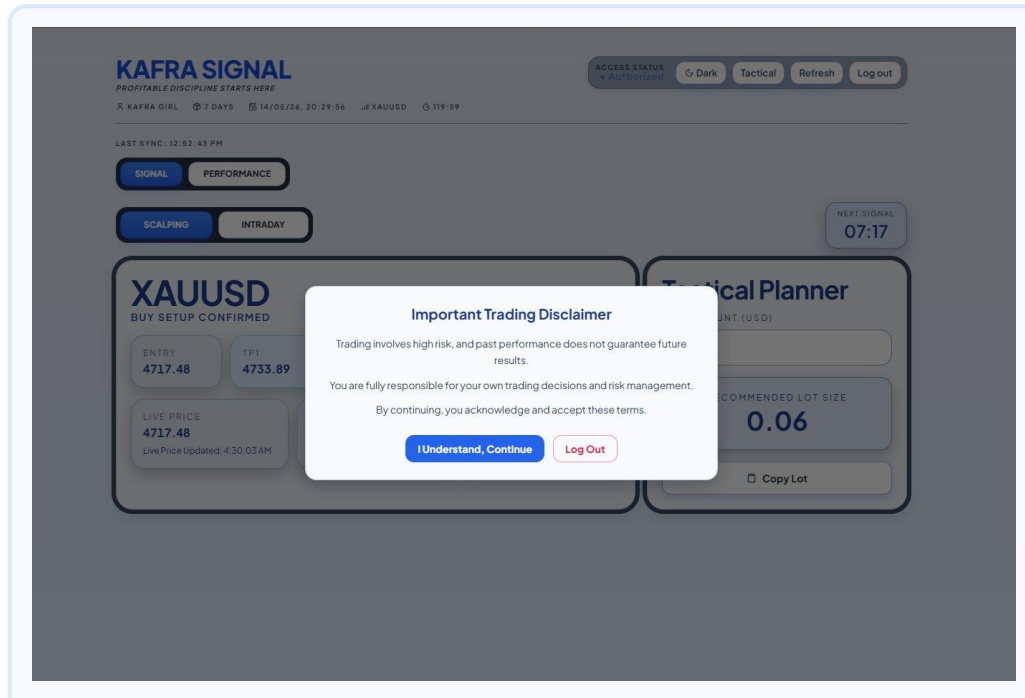

Figure 2.2 – Disclaimer appears after successful login

This disclaimer is an important reminder that trading involves high risk. All trading decisions are entirely your responsibility. KAFRA SIGNAL only provides signal information based on technical analysis.

03 | DASHBOARD NAVIGATION

Interface, Buttons & Status Indicators

Dashboard Layout Guide

KAFRA SIGNAL (Logo)	Click to refresh the main page.
Profitable Discipline...	Platform tagline – your trading mindset guide.
KAFRA GIRL	Your access persona/package name.
7 DAYS	Remaining active subscription period.
14/05/26, 20:29:56	Date & time of the last generated signal.
XAUUSD	The instrument currently being monitored.
119:44 (Countdown)	Time until the next signal (minutes:seconds).
ACCESS STATUS – Authorized	Confirmation: your access is valid and active.
Dark / Tactical (toggle)	Switch display theme: light, dark or tactical.
Refresh	Manually refresh data if needed.
Log out	End your current dashboard session.
LAST SYNC	Last time data was updated from the server.
NEXT SIGNAL	Countdown timer to the next signal.

Main Dashboard Tabs

- **SIGNAL** – Displays the latest signal: Entry, TP, SL and current live price.
- **PERFORMANCE** – Displays trade statistics: Win Rate, Total Pips, trade history.

Trading Modes

- **SCALPING** – Signals generated more frequently (every 30 minutes). Smaller TP, lower risk. Ideal for active traders.
- **INTRADAY** – Signals based on the main market trend. Larger TP (100–200+ pips). Ideal for patient traders.

04 | SIGNAL TAB

How to Read Signals, Entry, TP & Stop Loss

Signal Tab – Scalping Mode

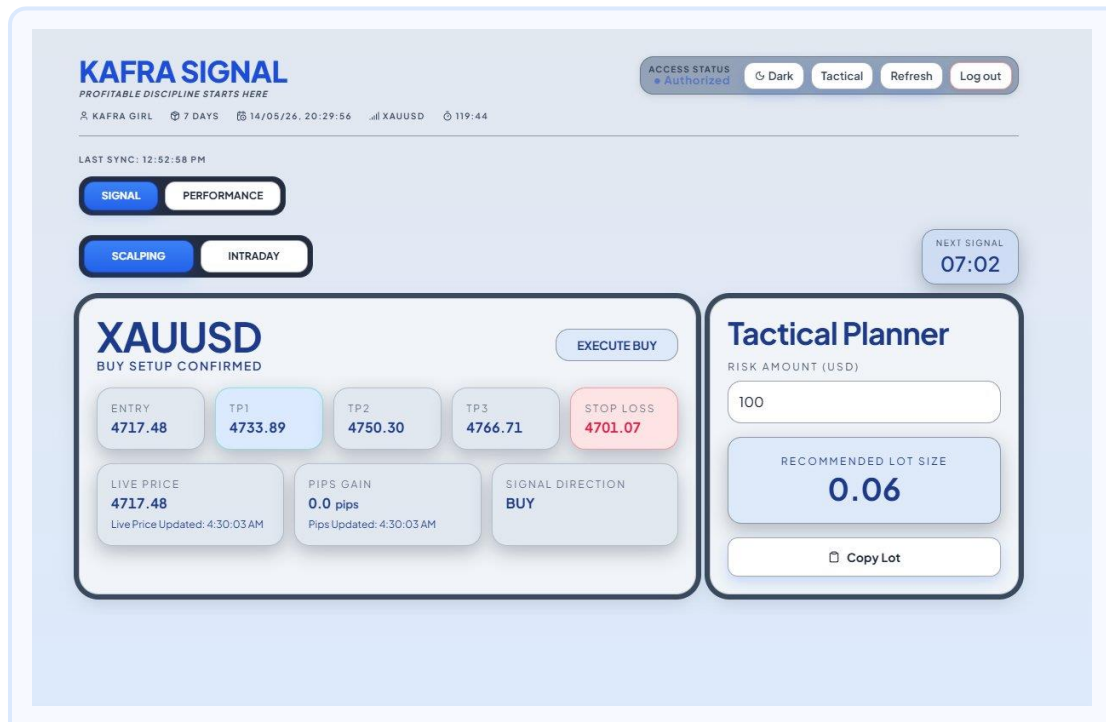

Figure 4.1 – Signal Tab (Scalping Mode): BUY SETUP CONFIRMED

Signal Tab – Intraday Mode

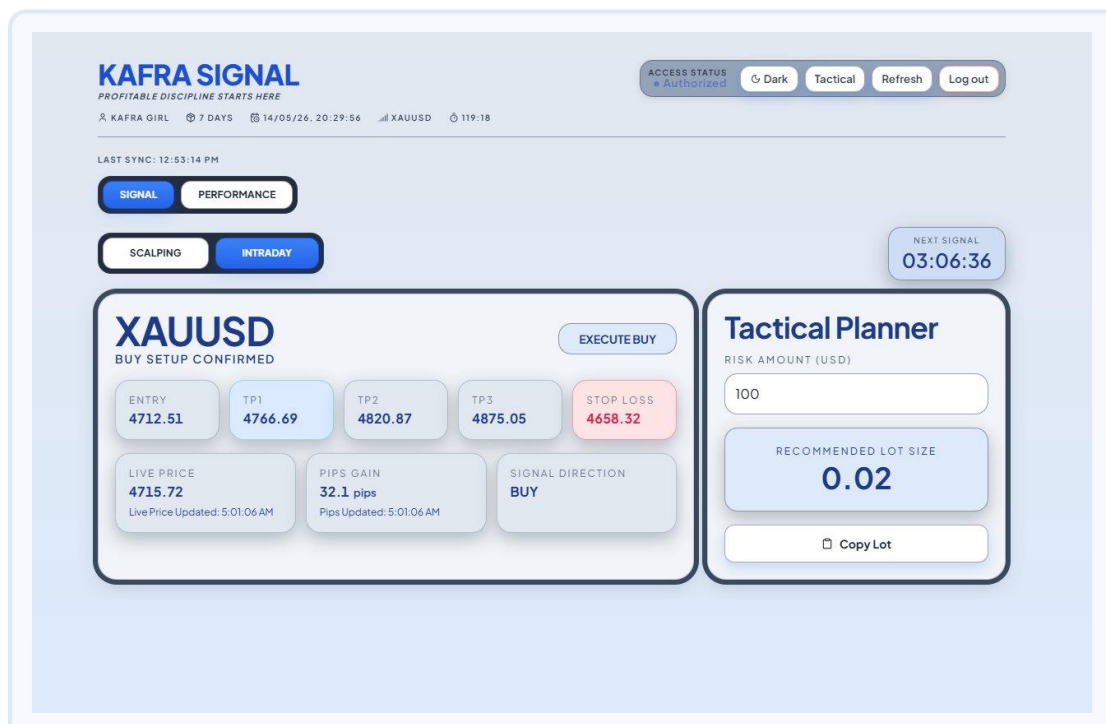

Figure 4.2 – Signal Tab (Intraday Mode): Larger TP targets, longer NEXT SIGNAL countdown

Understanding the Signal Box

XAUUSD	The instrument being traded (Gold vs US Dollar).
BUY SETUP CONFIRMED	Signal direction: BUY (long) or SELL (short).
ENTRY	Recommended entry price suggested by the system.
TP1 (Take Profit 1)	First profit target – safest level, take partial profit.
TP2 (Take Profit 2)	Second target – larger profit potential.
TP3 (Take Profit 3)	Maximum target – trail stop after TP2 is hit.
STOP LOSS (red)	Mandatory loss limit to be set on every trade.
LIVE PRICE	Real-time Gold price – updated automatically.
PIPS GAIN	Current pips profit/loss from the entry price.
SIGNAL DIRECTION	Direction confirmation: BUY or SELL.
EXECUTE BUY/SELL	Visual trade instruction reminder – not an auto-trade button.

- **Scalping:** Shorter NEXT SIGNAL countdown (minutes). TP range within 10–50 pips.
- **Intraday:** Longer NEXT SIGNAL countdown (hours). TP can reach 100–250+ pips.
- **Choose ONE** mode only per trading session — do not mix both modes.

05 | TACTICAL PLANNER

Lot Size Calculation Based on Your Risk

What is the Tactical Planner?

The Tactical Planner is a built-in risk management tool in the KAFRA dashboard. It calculates the appropriate lot size based on the risk amount you set in USD. This ensures every trade stays within your controlled risk limit.

1**Enter Risk Amount (USD)**

Input the amount you are willing to risk on a single trade. Example: \$100 means your maximum risk for this trade is \$100.

2**Check Recommended Lot Size**

The system automatically calculates the appropriate lot based on your risk and the current signal's Stop Loss distance.

3**Click 'Copy Lot'**

Press the Copy Lot button to copy the lot value to clipboard. Then paste it directly into your trading platform.

■ **Golden Rule: Never risk more than 1%–2% of your account balance on a single trade.**
Example: \$5,000 balance → maximum risk of \$50–\$100 per trade.

Calculation Example:

Account Balance	\$5,000 USD
Risk per Trade	2% = \$100
Stop Loss Distance	160 pips (based on current signal)
Calculated Lot	0.06 lot (as shown in dashboard)
Actual Risk	\$96 USD – within safe limit

06 | PERFORMANCE TAB

Win Rate, Pips & Trade History Analysis

Performance Tab – Scalping Mode (Weekly)

Figure 6.1 – Performance: Scalping Weekly – Win Rate 92.5%, 20,786 Pips

Understanding Performance Statistics

WIN RATE %	Percentage of signals that reached TP or BE. 92.5% = exceptional performance.
TOTAL PIPS	Total pips accumulated within the selected time period.
SIGNAL COUNT	Number of signals generated during the selected period.
TOTAL TP	Number of trades that hit Take Profit (TP1, TP2 or TP3).
TOTAL BE	Number of trades that reached Break Even (no loss, no profit).
TOTAL SL	Number of trades that hit Stop Loss (loss incurred).

Time Filter Options

- DAY – View today's performance only.
- WEEK – View the last 7 days' performance (default).
- MONTH – View the entire month's performance.
- CUSTOM – Select your own start and end dates.

Performance Tab – Intraday Mode (Weekly)

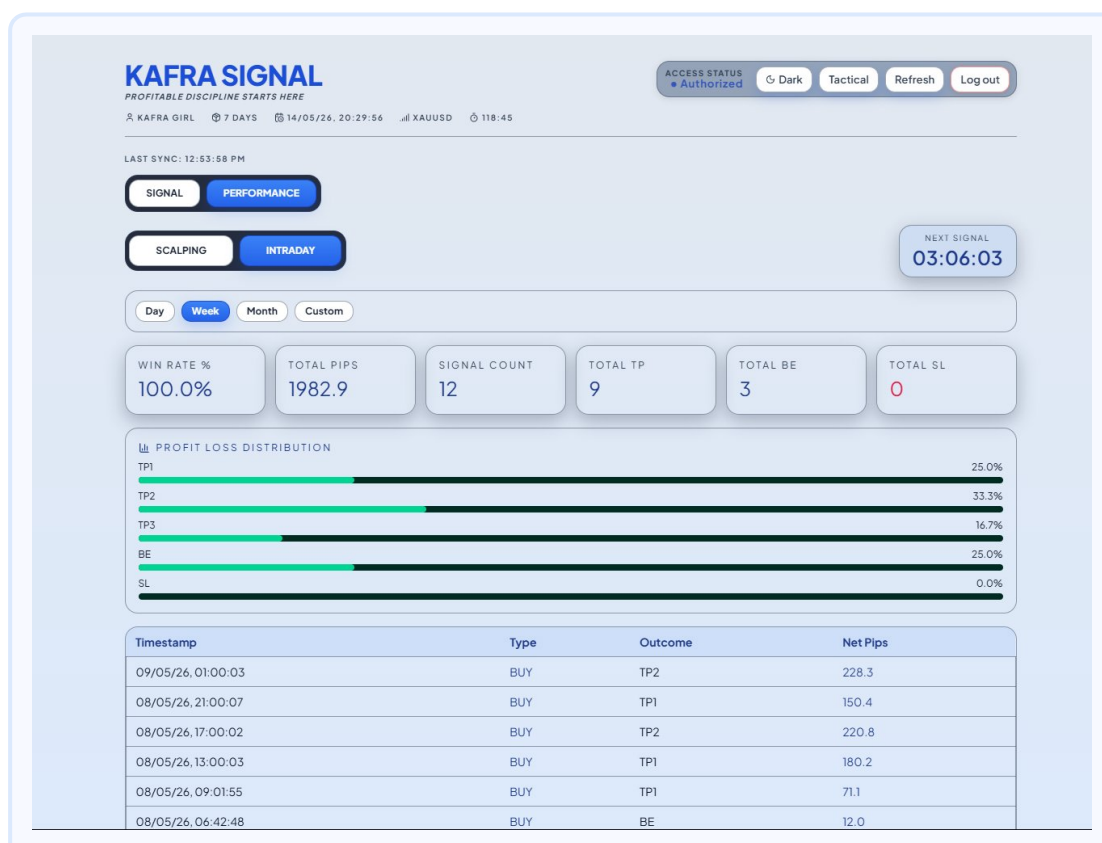

Figure 6.2 – Performance: Intraday Weekly – Win Rate 100%, 1,982 Pips, 0 SL

Profit/Loss Distribution Chart

This bar chart shows the percentage breakdown of trade outcomes by category: TP1, TP2, TP3, BE and SL. Longer green bars indicate stronger performance. Use this chart to understand which mode best suits your trading style.

07 | ENTRY & EXIT SOP

KAFRA Standard Trading Procedure

Trade Entry Procedure (Follow This Order!)

1	Open Dashboard & Select Mode Decide whether you will trade Scalping or Intraday for this session. Do not switch modes mid-session.
2	Wait for a New Signal Monitor the NEXT SIGNAL countdown. Only enter a trade when a NEW signal appears. Never trade on an old or expired signal.
3	Check Direction & Price Levels Read carefully: BUY or SELL? What are the Entry, TP1, TP2, TP3 and Stop Loss levels?
4	Calculate Lot via Tactical Planner Enter your risk amount → copy the recommended lot → paste into your trading platform.
5	Open Position in Trading Platform Open the trade as instructed: Market Entry or Pending Order. Set TP and SL exactly as shown in the dashboard.
6	Monitor & Manage After entry, monitor trade progress. Consider moving SL to Break Even after TP1 is hit.
7	Close the Trade When TP1/TP2/TP3 is reached, take your profit. If SL is hit, accept it and wait for the next signal.

Trade Exit Procedure

- Conservative: Close all lots at TP1. Lower profit but highly consistent.
- Balanced: Close 50% at TP1, remaining at TP2. Good balance of safety and profit.
- Aggressive: Hold until TP3. Higher risk but maximum profit potential.
- Move to Break Even: After TP1 is hit, move SL to entry price to protect capital.

08 | RULES & RISK MANAGEMENT

Mandatory Trading Discipline

STRICTLY PROHIBITED – NEVER DO THIS!

- Do NOT trade during High Impact News events (30 minutes before & after).
- Do NOT enter any trade without setting a Stop Loss. SL is your capital shield.
- Do NOT use lot sizes exceeding 3%–5% of account risk. This is dangerous long-term.
- Do NOT mix Scalping and Intraday signals within the same trading session.
- Do NOT revenge trade after an SL hit. Wait calmly for the next signal.

BEST PRACTICES – ALWAYS FOLLOW THESE!

- Always use the Tactical Planner before every trade to calculate the correct lot size.
- Record every trade in a journal: entry, exit, outcome and lessons learned.
- Focus on signal quality, not quantity. 3 good trades beat 10 random ones.
- Take a break if you hit 2 consecutive SLs. Market conditions may be unfavourable.
- Review the Performance tab weekly to understand your profitability pattern.

Trading Psychology

Success in trading is not just about having good signals — it is also about your mental discipline. KAFRA SIGNAL provides the best signals; your job is to follow them calmly and consistently.

- Accept SL as a business cost — not a failure.
- Never let emotions (fear or greed) influence your trading decisions.
- One SL does not define your entire trading week.
- Profitable Discipline Starts Here — make discipline your trading identity.

09 | FREQUENTLY ASKED QUESTIONS

Common Questions & Answers

FAQ

Signal not appearing?	Check your internet connection & click Refresh. Wait for the NEXT SIGNAL countdown.
Access Key not working?	Check spelling. No spaces before or after the key. Contact admin if issue persists.
Can I use 2 accounts?	No. Each key is strictly for 1 user only.
Can I use other instruments?	KAFRA is designed exclusively for XAUUSD. Do not use on other instruments.
My key has expired?	Contact admin to renew your subscription.
Dashboard loading slowly?	Try clearing your browser cache or switching to Chrome (recommended).

◆ THANK YOU FOR BEING PART OF KAFRA SIGNAL ◆

Remember: A great system + Consistent discipline = Extraordinary results. Keep learning, keep improving, and never stop growing.
